Claim Rejections - 35 USC § 102

- The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

** Claim(s) 1-⁶~~8~~ are rejected under 35 U.S.C. 102(b) as being anticipated by Neese et al.

(4555151).

-- In reference to Claim(s) 1, Neese shows([(cover sheet) and (see examiner's figure)]) a first U-shaped yoke, a second U-shaped yoke, a connecting portion formed between the first and second U-shaped yokes, and a contact portion extending downwards and then parallel from a distal end of the second yoke, each of the first and second yokes having an opening facing towards the same direction.

-- In reference to Claim(s) 2, Neese shows (see examiner's figure) the first yoke comprises a substantially horizontal solderable portion, a first upright portion extending downwards from a

distal end of the solderable portion, and a first recurvature portion extending rightwards from a distal end of the first upright portion.

-- In reference to Claim(s) 3, Neese shows (see examiner's figure) the connecting portion extends downwards from a distal end of the first recurvature portion.

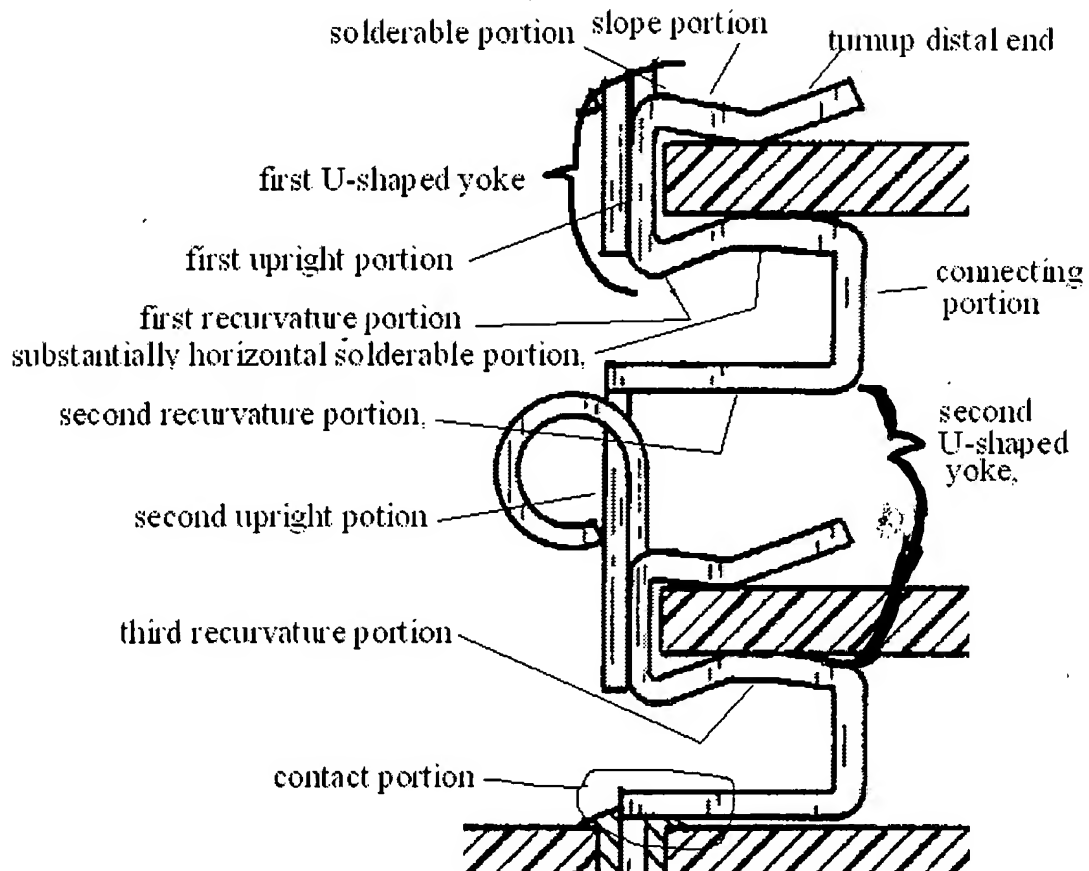

-- In reference to Claim(s) 4, Neese shows (see examiner's figure) the second yoke comprises a second recurvature portion, a second upright portion extending downwards from a distal end of the second recurvature portion, and a third recurvature portion extending rightwards from a distal end of the second upright portion.

-- In reference to Claim(s) 5, (see examiner's figure) the solderable portion comprises a slope portion having a turnup distal end.

** Claim 6 is rejected under 35 U.S.C. 102(b) as anticipated by Neese or, in the alternative, under 35 U.S.C. 103(a) as obvious over Neese.

-- In reference to Claim(s) 6, Neese shows (see examiner's figure) the opening of the second yoke is larger than that of the first yoke.
